## Heavy-type wire cable trays, electro zinc plated according to EN ISO 2081

The wire cable trays have a 'U-form' diameter. Each border has two parallel longitudinal threads which guarantee good protection during handling. The transversal threads have been welded between these two parallel threads.

The 'U-form' wire cable trays are made of steel wire with a high resistance and with a diameter of 5 mm. They are bicromatically and electrolytically galvanized according to the EN ISO 2081 norm, with a zinc coating with a variable thickness of 6 to 8 micron. The meshes have a dimension of 50 mm x 100 mm.

The accessories have 90° bends, T-pieces, and branches and are manufactured on site with gauze and joints. The attachments, jointing plates, supports and brackets should be provided with the supplied material. These accessories offer the same protection against corrosion as the gauze.

The wire cable trays are available in the following dimensions: (height x width)

35 x 100  
35 x 150  
35 x 200  
35 x 250  
35 x 350  
35 x 450  
35 x 550

60 x 50  
60 x 100  
60 x 150  
60 x 200  
60 x 300  
60 x 400  
60 x 500

Vergokan or similar.
