Heavy-type wire cable trays, hot-dip galvanized according to EN ISO 1461

The wire cable trays have a 'U-form' diameter. Each edge has two parallel longitudinal threads which guarantee good protection during handling. The transversal threads have been welded between these two parallel threads.

The 'U-form' wire cable trays are made of steel wire with a high resistance and with a diameter of 5 mm. After having been manufactured, they are hot-dip galvanized by immersion, in accordance with the EN ISO 1461 norm with a zinc layer of 50 to 80 micron. The meshes have a dimension of 50 mm x 100 mm.

The accessories have 90° bends, T-pieces, and branches and are manufactured on site with gauze and joints. The attachments, jointing plates, supports and brackets should be provided at the supplied material. These accessories offer the same protection against corrosion as the gauze.

The wire cable trays are available in the following dimensions: (height x width)

35 x 100
35 x 150
35 x 200
35 x 250
35 x 350
35 x 450
35 x 550

60 x 50
60 x 100
60 x 150
60 x 200
60 x 300
60 x 400
60 x 500

Brand: Vergokan or similar.
