

Thermote & Vanhalst  
Workshop

## ABOUT

TVH is building a new workshop for the maintenance of their rental machines and vehicles.

The round shape of the building allows for a centralized utility unit, around which different work zones can operate at the same time.

## NAME OF PROJECT

Location: Waregem, Belgium

Contractor: EEG

## DESCRIPTION

TVH Equipment is a Flemish family business that has focused on the sale, rental and maintenance of aerial work platforms, earthmoving and forklift trucks as well as operator training for more than 50 years. They are active throughout Belgium.

TVH Equipment is about much more than machine rental. With perfectly maintained machines, targeted advice and a service you can rely on. "Rent from a friend" is their slogan.

## DETAILS

### SECTOR:

Machine rental

### PRODUCTS:

GVFUL  
VFU(L)35

KBSI60

### DATE:

2023

## CHALLENGES

A round building poses more challenges than rectangular buildings. The biggest challenge however, was the requirement of the architect to work with a really shallow cable tray, which could hold light fixings.

## SOLUTION

We presented our NATO cable tray (originally designed for ships of the Belgian navy) in zinc magnesium, with adapted perforation, for the light fixings to fit.
