

FLOOR INSTALLATIONS

Floor installations

In this ever-changing society the range of connection possibilities required is increasing all the time.

These days, the keywords for offices are integrated systems, flexibility, connectivity and durability. Connecting services from within the floor satisfies all these requirements.

What is more, users are also interested in aesthetics: floor boxes are expected to blend in harmoniously with the interior.

For screeded floors, Vergokan offers a single universal floor box: the NEO. The adjustable height of this universal floor box can be matched to the height of the floor trunking used (28mm, 38mm or 48mm). The width in turn can be adjusted to floor trunkings that are 170mm, 250mm or 350mm wide.

The Vergokan blanking and hinged covers have been designed to fit in with the contemporary, minimalist look in offices, museums, lobbies, shopping centres and modern homes.

The systems are suitable for any type of floor finish (carpet, tiles, vinyl, epoxy, polymer concrete, parquet, etc.).

The choice of subfloor depends on the following:

- Architectural requirements
- Organisational requirements
- Aesthetic requirements
- Safety requirements

The choice of cover depends on the floor finish:

- Carpet
- Linoleum
- Vinyl
- Parquet
- Tiles
- Epoxy
- Polymer concrete
- etc.

Uniform concrete floor systems

SCREEDED FLOOR

FLOOR TRUNKING and UNIVERSAL FLOOR BOX

Floor trunkings and floor boxes form a cable grid concealed in the screed. The covers provide access to electricity, data and telecommunications networks.

Our recessed floor trunkings are suitable for all kinds of screed. Our universal NEO floor box is used as an intersection between the trunkings or tubes and works with all types of floor trunking. The height and width are easy to adjust. This means that all the floor trunkings fit perfectly inside the same floor box.

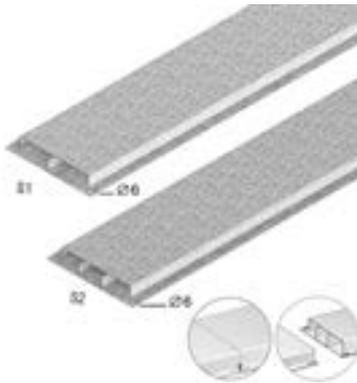

Depending on the shape of the cover, a form element is placed on the floor box. This ensures that screed of 65mm to 298mm can be poured. There is no need for levelling to pour the screed. The form element guarantees a neat and rimless cut-out in the poured screed. Once the screed has been poured, the form element is removed and the cover can then be applied nicely.

This underfloor system is ideal for supplying large areas, particularly in offices and commercial buildings.

VGI28

Floor trunking with integrated ends

1.

With 2 or 3 compartments.

Thickness cover	1,50 mm

Covers for concrete floor, not water resistant

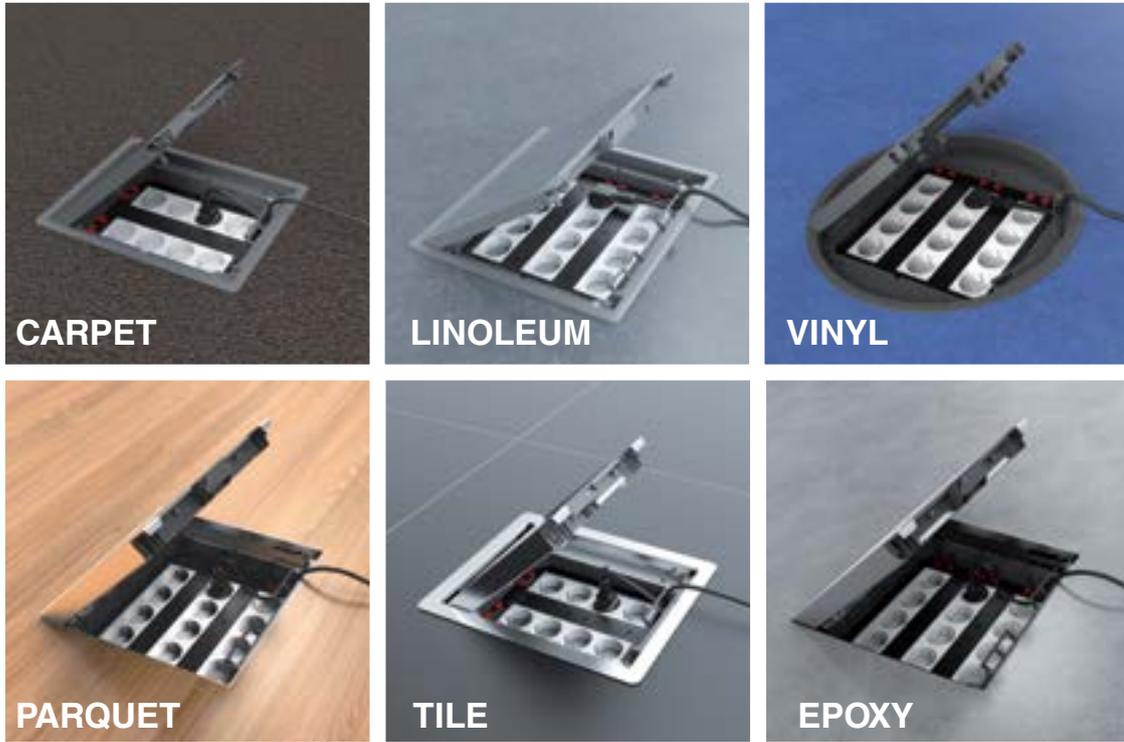

SCREEDED FLOOR, NOT WATER RESISTANT

CARPET | LINOLEUM | VINYL - PARQUET | TILE | EPOXY

Depending on the shape of the cover, a form element is placed on the universal NEO floor box. This ensures that screed of 65mm to 298mm can be poured. Once the screed has been poured, the form element is removed and the cover can then be applied nicely with the clamps provided.

The stainless steel covers with a bottom frame are then easy to level using the NEOT aluminium frame supplied.

The minimalist design of the hinged covers makes for a nice discreet unit in any interior. These covers are made of polypropylene or grade 304 stainless steel. The covers are also suitable for any type and thickness of floor finish which is dry treated.

For use in dry floors only.

Covers for concrete floor, water resistant

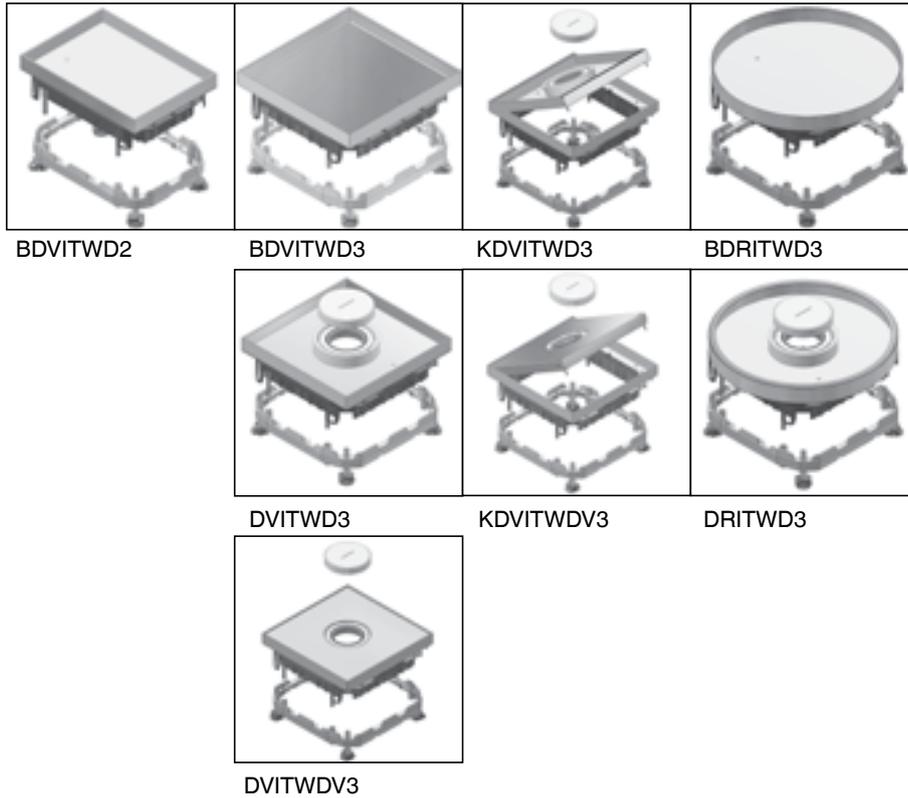

SCREEDED FLOOR, WATER RESISTANT

TILE | EPOXY | POLISHED CONCRETE

Depending on the shape of the cover, a form element is placed on the universal NEO floor box. This ensures that screed of 65mm to 298mm can be poured. Once the screed has been poured, the form element is removed and the cover can then be applied nicely.

The covers are easy to level using the NEOT aluminium frame supplied.

The minimalist design of the hinged and blanking covers makes for a nice discreet unit in any interior. These covers are made of grade 304 stainless steel. The covers are also ideal for areas which are wet treated.

Covers for raised floor, not water resistant

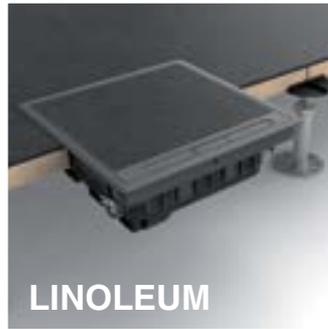

RAISED FLOOR, NOT WATER RESISTANT

CARPET | LINOLEUM | VINYL | PARQUET

For application in raised floors or floor systems, covers are used with universal pre-assembled clamps that are fixed in the floor panel. Clamping range between 30mm and 50mm.

The minimalist design of the hinged and blanking covers makes for a nice discreet unit in any interior. These covers are made of polypropylene or stainless steel.

The covers can be used in areas which are exclusively dry treated.

Tested to EN 50085-2-2.

Hinged cover for 2 compartments.

Depth of floor covering is standard 5 mm and can be reduced by fitting packers OHEV2.2 and/or OHEV2.5.

Can be fixed through included universal clamps in raised floor panels.

- Cut-outs in the floor panels 270x195 mm (with a tolerance of -1 mm to +2 mm).
- Clamp range between 30 and 50 mm

Hinged cover is provided with 1 cable outlet with integrated push lever and cable organiser. Hinged cover must not be earthed.

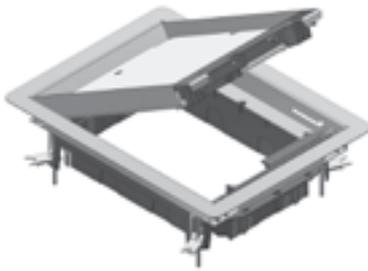

For use in dry floors only.

COVERS FOR RAISED FLOOR, NOT WATER RESISTANT

4.

Flush floor trunking system

5.

FLUSH FLOOR TRUNKING, NOT WATER RESISTANT

CARPET | LINOLEUM | VINYL

The OVG open floor trunkings lie flush with the screed. These trunking systems can be opened along their entire length, making them ideal for regular changes to the cables laid. The covers are mounted directly in the trunking.

The levelling range is from 55mm to 110mm. Hinged covers can be mounted from a levelling height of 70mm.

OVG

Open flush floor trunking

Ideal for frequent addition or removal of cables. For both new constructions and renovations.

To order till height 150 mm

The technical information for this product can be found at the end of this chapter.

Tested according EN 50085-2-2.

- Used in screeded floors to be finished with carpet or vinyl.
- Levelling range: 55 to 110 mm.
- Hinged covers can be mounted from levelling height 70 mm.
- Universal side for all levelling heights.
- Straightforward assembly of accessories with plastic corner connector.

Each flush floor trunking comes standard with the following products:

- 2 Extrusion profile (OVGP)
- 2 Universal sides (OVGZ)
- 3 Cross bars (OVGTR)
- 2 Carpet borders (OVGTAP)*
- 3 Sealed covers (DOVG)
- 6 Levelling pieces
- 16 Taperedhead metal screws (ST48x23)
- 6 Screed anchor (OVGAN)
- 12 Tapered head bolts (BZ5.16)
- 6 Levelling screws
- 2 Baseplates (OVGVST)

* Gauge of OVG TAP depends on the gauge of the cover.

OVG

Technical information

1) Slip the OVGZ (a) into the chamber (b) of the OVGPR (c). A levelling range of 55-80 mm is obtained by placing the OVGZ with its longest side on the ground. A levelling range of 80-110 mm is obtained by placing the OVGZ with its shortest side on the ground.

2) Mount 3 OGVSTs (d) per OVGPR (c). The 2 OGVST provided with a baseplate (e) are mounted at the end where an OVGTR (f) has been placed. These 2 OGVST must be positioned so that they overlap the duct with half of their length. The preassembled baseplates (e) must abut against the OVGZ (a). Mount the other OGVST at intervals of 800 mm. Extra OGVSTs can be easily added by hooking them into the slot (g) in the OVGPR.

3) The 2 OGVST which overlap the duct, will be used for coupling with the abutting length.

4) Determine how you will use the OVGTR 3 (h): flush mounted or not. Turn levelling screws (i) to the right for levelling up. Turn levelling screws (i) to the left for levelling down. Hook the OVGAN (j) into the slot (g) in the OVGPR. Make sure to seal up any openings with adhesive tape.

5) The system can now be filled with screed (m) and subsequently finished (l).

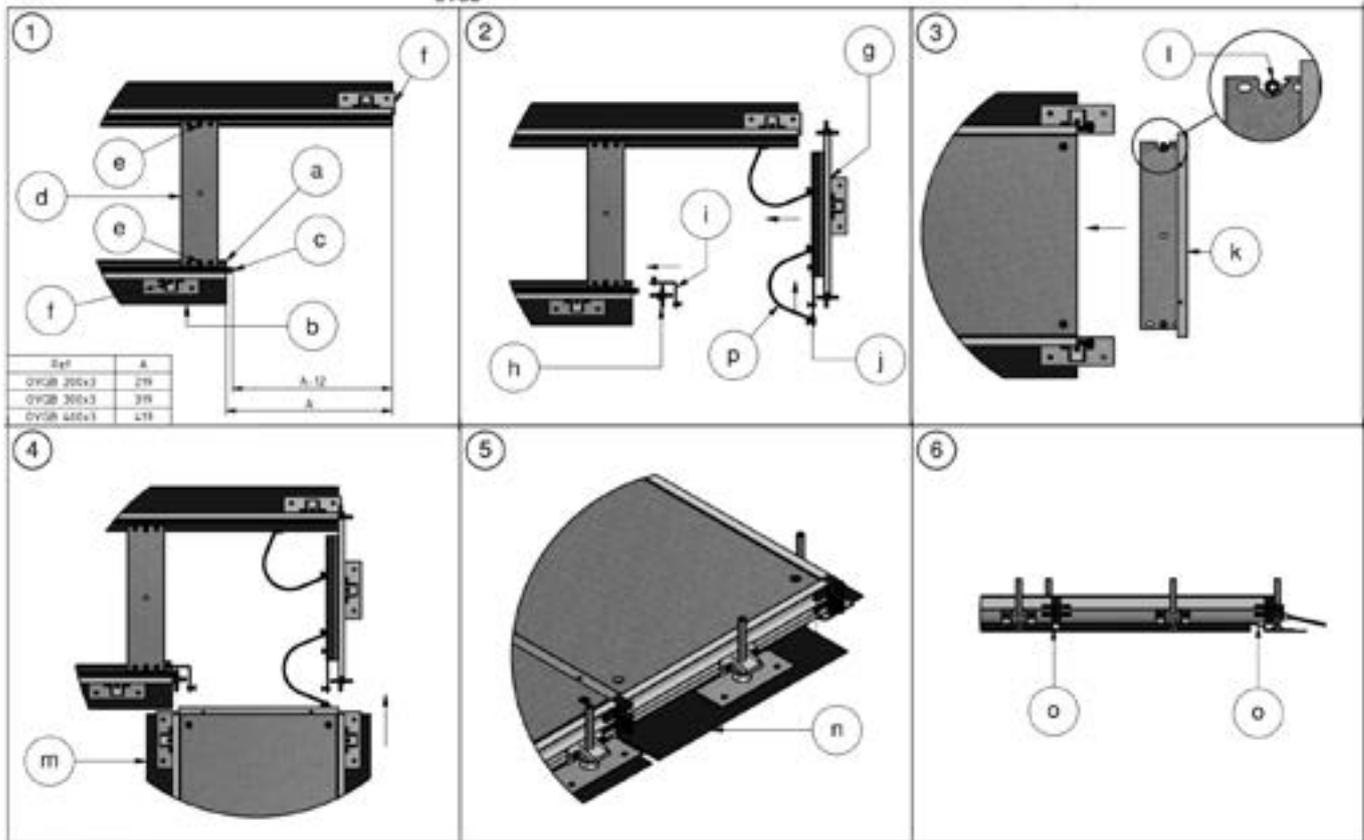

Remark

! To obtain a levelling height of less than 80 mm, shorten the levelling screws to below the top of the aluminium section (k) before pouring the screed (m).

! Note: when laying or removing cables we advise you not to remove the traverses between the aluminium sections.

OVGB

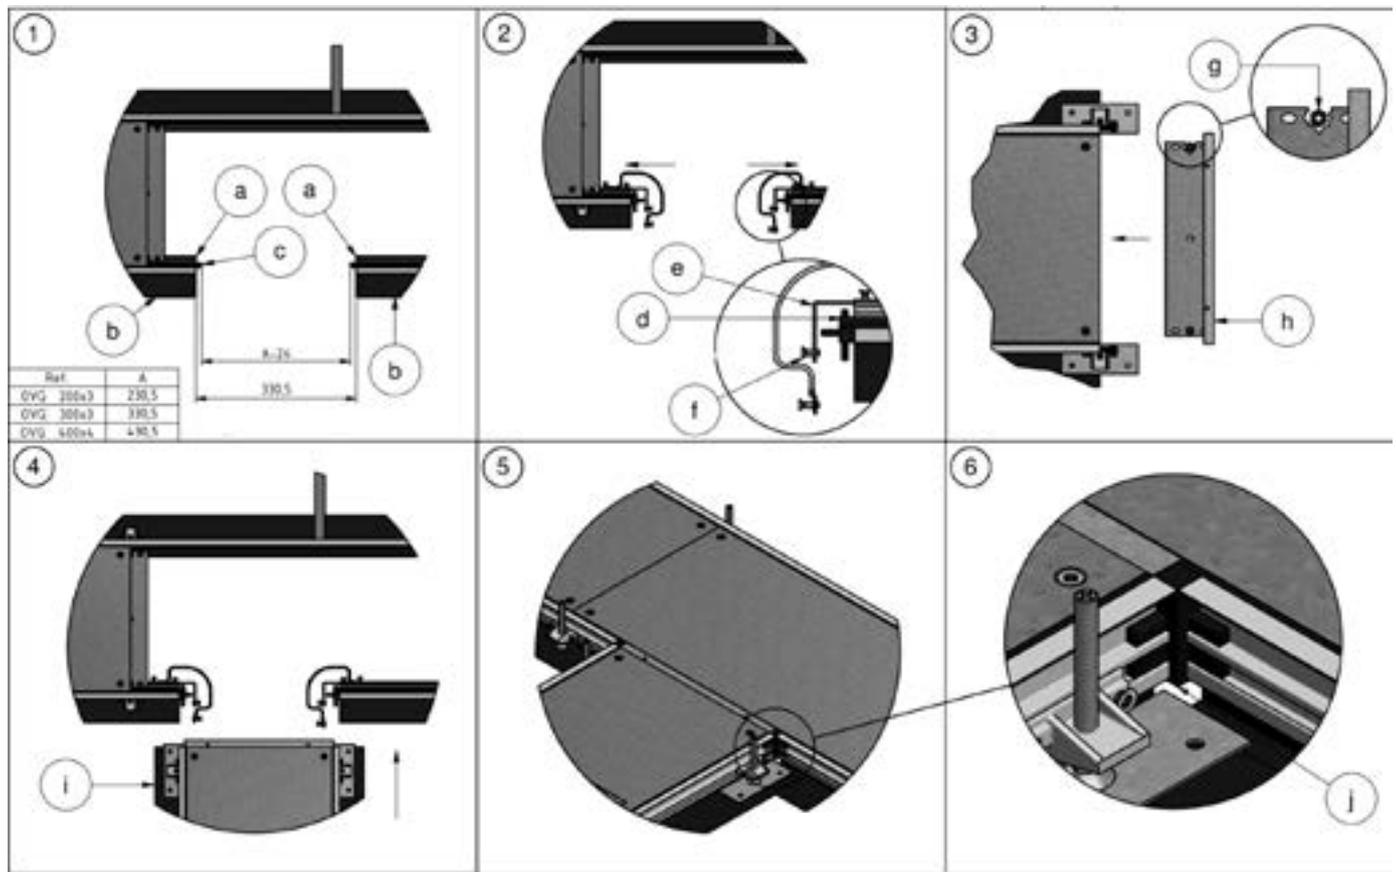

Technical information

1. Remove the length stated in the table from the aluminium profile (a) and the side section (b). Remove a section from the carpet surround that is 12 mm shorter. Move the traverse section (d) of the end section so that it is positioned between the two profiles and fasten with the two screws (e). Reposition the feet (f) as shown in the drawing.
2. Position the earthing strap under corner (i) along with the plastic corner connector (h) in the aluminium profiles of the section which you want to branch off from. Fasten the right earthing clamp (j) the plastic corner connector (h) and the 2 earthing cables (p) in the aluminium profile of the end section. Scovere the end section (g) onto the section you want branch off from and connect 1 earthing cable.
3. Locate the traverse for the supports (k) under the cover of the section from which you are branching off. In order to hold the traverse section at the right level the M6 bolts supplied (l) must be positioned under the most central opening along both sides of the traverse section. Attach the top to the traverse section making use of the most central opening.
4. Scovere the section you want to branch off from (m) on to the plastic corner connectors that you have attached to the section from which you want to branch off.
5. Cut to size a surplus section of the side (n) so this can be slid into the end section in order to close it off. Line everything up.
6. Seal off all openings (for example o) with adhesive tape.

OVGT

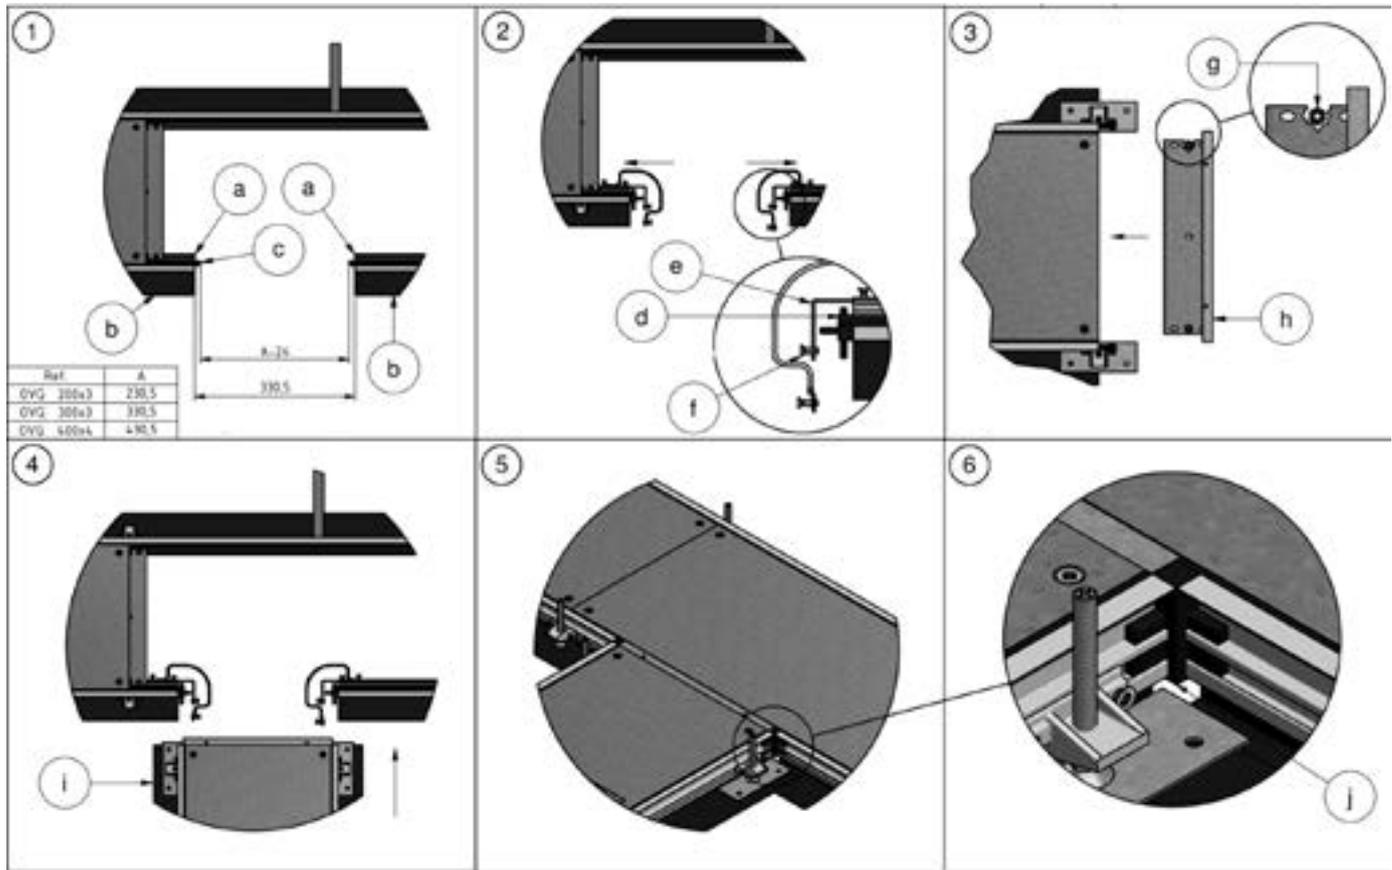

Technical information

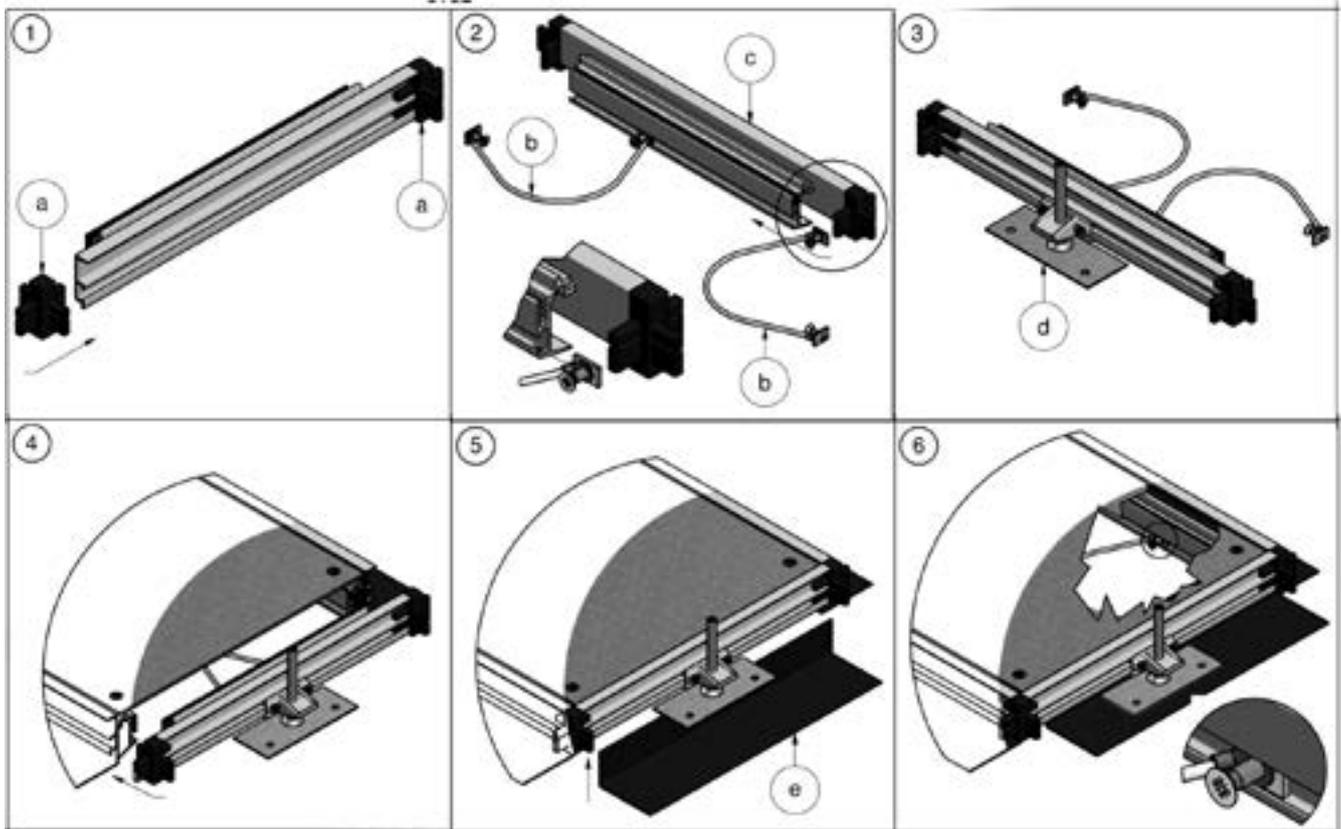

1. Remove the length stated in the table from the aluminium profile (a) and the side section (b). Remove a section that is 24mm shorter from the carpet surround (c) so that the edges extend on both sides of the aluminium profile by 12mm.
2. Locate both earthing straps under corner (e) along with the 2 plastic corner connectors (d) in the aluminium profiles of the section from which you want to branch off. Fix in position the earth straps (e) using the M5 screws provided (f).
3. Position the traverse section (h) for the supports under the cover of the sections you want to branch off from. In order to hold the traverse section in the right position you must locate the M6 bolts provided at both sides in the most central hole of the traverse section. Attach the top to the traverse section making use of the most central opening of the traverse section.
4. Scove the section which you want to branch off from (i) onto the plastic corner connectors and the earthing straps which you have attached to the section you want to branch off to.
5. Align all components until everything is in line.
6. Close up all openings (for example j) with adhesive tape.

OVGK

Technical information

1. Remove the length stated in the table from the aluminium profile (a) and the side section (b). Remove a section that is 24mm shorter from the carpet surround (c) so that the edges extend on both sides of the aluminium profile by 12mm.
2. Locate both earthing straps under corner (e) along with the 2 plastic corner connectors (d) and the 2 earthings cables (k) in the aluminium profiles of the section from which you want to branch off. Fix in position the earth straps (e) and the 2 earthings cables (k) using the M5 screws provided (f).
3. Position the traverse section (h) for the supports under the cover of the sections you want to branch off from. In order to hold the traverse section in the right position you must locate the M6 bolts provided at both sides in the most central hole of the traverse section. Attach the top to the traverse section making use of the most central opening of the traverse section.
4. Scovere the section which you want to branch off from (i) onto the plastic corner connectors and the earthing straps which you have attached to the section you want to branch off to. Fix the earthing cables (k).
5. Follow steps 1-4 for the other side of the OVG where you want to branch off.
6. Align all components until everything is in line.
7. Close up all openings (for example j) with adhesive tape.

OVGE**Technical information**

1. Locate the 2 corner connectors OVGHV (a) in the ends of the profile that is provided with the end section.
2. Attach one end of the earthing straps supplied (b) in the slot provided on the inside of the profile (c).
3. Mount a foot (d) in the middle of the profile of the end section.
4. Scovere the end section into the length of the OVG which you want to close off.
5. Cut a side section (e) to size and attach this under the end section as this is done for the section runs.
6. Attach the other end of the earthing straps into the aluminium profiles of the section you want to close off.

Accessories

NEOT

Supporting Alu-frame

Universal supporting frame.
Integrated in covers KDVIT, KDVITV3, DRIT3, DVITWD3, DVITWDV3, BDVITWD, KDVITWD3, KDVITWDV3, BDRITWD3, DRITWD3.

Standard finish Aluminium

HD	Reference	↑ mm	↔ mm	↗ mm	↘ mm	kg/piece	📦	Stock	Unit
-	NEOT2	-			-	0.750	1		piece
-	NEOT3	-			-	0.750	1		piece

Set contains:

- Aluminium frame
- 4 extension nuts AM6.48
- 4 anchorfeet
- 4 long bolts M 8x70
- 4 short bolts M 8x45

Higher leveling range can be achieved per added set of 4 nuts AM6.48.

- 1 set = 92 - 145 mm.
- 2 sets = 140 - 193 mm.
- 3 sets = 188 - 241 mm.
- 4 sets = 236 - 289 mm.

NEOAVT

Anchor base NEO

Standard finish Polypropylene

HD	Reference	↑ mm	↔ mm	↗ mm	↘ mm	kg/piece	📦	Stock	Unit
-	NEOAVT	-			-	0.027	12		piece

To order per full packaging.

NEOTVT**Support NEOT**

Individual leveling foot for the NEOT Alu-rim.
Only to be used with raised floorsystems.

Standard finish

Pre-galvanised

HD	Reference	↑ mm	↔ mm	↔ mm	↔ mm	kg/piece	⊞	Stock	Unit
-	NEOTVT	-				0.030	4		piece

The technical information for this product can be found at the end of this chapter.
To order per full packaging.

AM**Extension Nut**

Standard finish

Electro zinc-plated

HD	Reference	↑ mm	↔ mm	↔ mm	↔ mm	kg/piece	⊞	Stock	Unit
-	AM6.48	48				0.034	12	✓	piece
-	AM6.96	96				0.067	12	✓	piece

Can be added to the aluminium frame.
To order per full packaging.

OHE

Packer floorcover

Packers can be added to level the floor finish in the covers.

Standard finish	Cardboard
-----------------	-----------

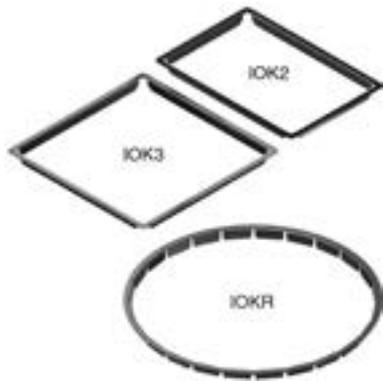

HD	Reference	↑ mm	↔ mm	↔ mm	↔ mm	kg/piece	⊞	Stock	Unit

- BDVIZ2 for BDVITWD2.
- BDVIZ3 for BDVITWD3.

TSBU

Apparatus cup universal

Clippable system.

Color	Black RAL 9011
Standard finish	Polypropylene

HD	Reference	↑ mm	↔ mm	↔ mm	↔ mm	kg/piece	📦	Stock	Unit
-	TSBU	-				0.090	12	✓	piece

To order per full packaging.
Tested to EN 50085-2-2.

Can be clipped and fixed in the cover frame at different heights.

Set containing:
- 2 screw-in cable restrainers

A bottom cover plate type ADPUB and cover plates ADPU, according to desired connections, can be added.
2 x 71mm module application is possible with 2 x APDU1.50.50. For use of 3 x 71mm module, please contact Vergokan.
Break away the extreme corners for mounting.

TSBU45

Apparatus cup 45

Clippable system.

Color	Black RAL 9011
Standard finish	Polypropylene

HD	Reference	↑ mm	↔ mm	↔ mm	↔ mm	kg/piece	📦	Stock	Unit
-	TSBU4.45.45	-				0.110	12	✓	piece

To order per full packaging.
Tested to EN 50085-2-2.

For 4 clip devices type 45x45.
Can be clipped and fixed in the cover frame at different heights.

Set containing:
- Base cup
- Cover plate ADPU4.45.45
- 2 screw-in cable restrainers
- Divider SSBU

A bottom cover plate, type ADPUB, can be added.
Break away the extreme corners for mounting.

TSBU50**Apparatus cup 50**

Clippable system.

Color Black RAL 9011

Standard finish Polypropylene

HD	Reference	↑ mm	↔ mm	↔ mm	↔ mm	kg/piece	📦	Stock	Unit
