

16KLL160

Cable ladder interlocking ends

Fix with:

Toothed round head bolt / flange nut I6VM

Side walls: perforated S-profile Perforated C rungs 15 x 30

Usable inner height: 44 mm Rung distance: 250 mm To order: Length 6000 mm

To order: Width 700 - 1200 mm (increments of 100 mm)

LOAD DIAGRAM

This diagram illustrates the permissible uniformly distributed horizontal loads applied to multiple supports. They comply with IEC 61537 with connection in the centre of the span and the end span = 0.8x the span.

F = max. admissible load (daN/m)

L =support distance (m) Max. deflection (m) = L/100

CHARACTERISTICS

- lightweight
- strong
- interlocking
- partition (I6SLOS35) can be fixed to the cable ladder with a sliding nut (I6GM6) and pan head bolt (I6RB6.10)
- no further coupling holes are required if the cable ladder is cut
- use joiners (I6KLLKP60) and bolts (I6VM6.10) to join the cut lenghts of cable ladder
- no joiners are required to attach accessories such as bends, tees etc.
- rungs are perforated to enable efficient attachment of cables.

TECHNICAL INFORMATION

Side walls are constructed from S profile with a return flange and are continuously perforated

Side walls are continuously perforated

C-profile rungs are fixed at 250 mm intervals

Rungs are mechanically attached to the side wall of the cable ladder Rungs are alternately placed with openings upwards and downwards.

Pickled and passivated.
