LOAD DIAGRAM

This diagram illustrates the permissible uniformly distributed loads applied to multiple supports. They comply with IEC 61537 with connection in the centre of the span and the end span = 0,8 x the span.

F = max. admissible load (daN/m)

L = support distance (m)

Max. deflection (m) = L/100

Other lengths on request: max. 6 m per steps of 100 mm. Can be attached in three ways: -KBVCL -VM6.10 -VMK6.10 (=RBK6.10 & RM6)
